Controlled Substances

Assured destruction through incineration

- Authorized by DEA to witness destruction on your behalf
- Accepting DEA regulated and DEA/RCRA regulated materials
- Turnkey Services—All steps are handled by Veolia personnel and facilities, from on-site pick-up through transport and incineration

What is a DEA controlled substance?

The United States Drug Enforcement Administration (DEA) regulates certain chemicals by requiring strict tracking from the time of manufacture to the time of dispensation to the consumer. They are called Controlled Substances and can be found in Title 21 of the Code of Federal Regulations (CFR) section 1300. These chemicals are divided into several lists, detailed in the regulations as Schedule I, II, III, IV and V. Controlled Substances can range from nonhazardous materials to RCRA hazardous wastes.

Management of controlled substances

Veolia is registered with the DEA as a Reverse Distributor which allows us to take possession of Controlled Substances from DEA registrants and destroy them at our incineration facilities. From packaging and pickup to destruction, Veolia maintains control of your waste at every step of the destruction process.

Veolia assures compliance

Regardless of what you need to dispose of, Veolia can accommodate your waste and assure regulatory compliance. You'll need to provide a copy of any required registration and the types and amounts of waste to be destroyed. Veolia will complete all necessary forms, take possession of the items to be destroyed and assure destruction is properly completed. Our incineration facilities and our transportation vehicles are owned and operated by Veolia, ensuring secure packaging, transportation and destruction.

Technical expertise

Veolia's technical representatives are thoroughly trained in safety and environmental regulations and are ready to assist you in any way. Ask us about government regulations, technical questions on treatment alternatives, training your employees, or setting up disposal programs to reduce your costs.

Why Veolia

- Outstanding environmental compliance record
- Financially sound
- Knowledgeable technical representatives
- State-of-the-art recycling capabilities
- Reducing waste, reducing cost

Candidates for Assured Destruction

- Chemicals Designated as DEA Controlled Substances
- Drugs
- Goods with Expired Dates
- Seized Goods
- Returned Goods
- Lab Chemicals
