Why Veolia Emergency Response?

- Rapid/On Time Response
- Experience and Expertise
- 24/7/365 Availability
- Regulatory Compliance
- Nationwide Coverage

Today, nearly every company and community is vulnerable to some form of environmental emergency. That emergency may be a small spill, a serious chemical release, an industrial fire, a terrorism incident, or a natural disaster.

Veolia is prepared to assist you in every phase of the emergency response incident, from planning and training to response and cleanup.

We are here to help every business, community, or organization with emergencies of any scope or magnitude. As a recognized leader in the emergency response business, Veolia offers 24/7/365 response service throughout the United States.

Effective emergency response requires a firm capable of quickly dispatching qualified and experienced personnel along with the necessary equipment and other resources to get the job started, then completed as efficiently as possible. As part of the world's largest environmental services company, we can draw upon the internal resources of a multi-billion dollar organization.

Veolia Response Network

Veolia has also taken steps to have essential resources in place and to establish an extensive service partner network throughout the US. Veolia is experienced in earthwork, remediation, project management, and hazardous waste disposal. We also own and operate a nationwide network of hazardous waste Transportation Storage Disposal Facilities (TSDF) and industrial service centers.

Whenever and wherever you need us, Veolia stands ready to manage your emergency incident from assessment through cleanup and closure.
